

AMF BRUNS ENTERS U.S. VEHICLE MODIFICATION MARKET

May 23, 2016 • Written by **Sean Gallagher** • Published in **Industry Releases**

HUDSON, Oh. — There are over 3 million wheelchair users in the U.S., a number rising daily as baby boomers continue to age. Until recently the U.S. paratransit industry had few options for suppliers of vehicle modification products. Enter AMF Bruns of America.

AMF Bruns is a one-stop shop providing wheelchair securement, occupant restraint systems and associated equipment for the safe transportation of wheelchair passengers. In the 1970's they developed the first wheelchair safety system and invented the world's first 4-point retractor wheelchair anchoring system. Founded in Germany in 1962, the U.S. distribution facility opened in 2013.

“As a global leader in the vehicle conversion market, we provide the complete accessories package to safely transport people with limited mobility,” said Steven Kost, operations manager of AMF Bruns of America. “This includes restraints, seating, shoulder harnesses, head & back rests and side & electric steps. We guarantee high quality and the market's best pricing.”

Products summary:

PROTEKTOR: System Wheelchair and Occupant Restraints: Provides critical stabilization for passengers in the event of a collision. The design rules out any wheelchair being improperly secured.

FutureSafe Head and Backrest: A flexibly adaptable and height adjustable head and backrest with an integrated certified shoulder belt.

Sidesteps: Improves vehicle access for physically-challenged passengers to enter and exit the vehicle, helping reduce injury and falls. Two options: Electric and manual.

Euroramps: Made of strong, lightweight, non-slip aluminum. Available in various lengths and widths. Options: Rear and side installation.

Seats: Certified according to the newest regulation UN/ECE R14, R16, R17, FMVSS. Available in a variety of designs and colors.

AMF Bruns ensures the highest degree of quality and safety for vehicle accessories used to help safely transport physically-challenged passengers. Kost adds: “Our mission is to offer safe, flexible and innovative passenger transport solutions for the paratransit industry, which ultimately improves the quality of life for the physically challenged.”

About AMF Bruns of America
